

RubricEye Exam

Answer Booklet

Name: _____

Candidate ID: _____

Date: _____ Exam Version: RE-01

Answer only the questions you choose.

Keep all writing and drawings inside the bordered areas.
For diagram/flowchart responses, use clear labels and arrows.

Q2(i)

4 marks

Newton's Second Law:

Statement: The acceleration on an object is directly proportional to the net force acting on it. and inversely proportional to its mass.

Mathematical Expression:

$$F = ma$$

where F is force, m is mass and a is acceleration.

Q2(ii)

4 marks

RAM- Random Access Memory

It is a volatile memory so all data is lost when computer is turned off.

It is used to store data and both reading and writing operations can be performed. **Example** is 8GB DDR4 RAM

ROM- Read Only Memory

It is a non-volatile memory so data is retained. Only reading operation can be performed on it. **Example** is BIOS chip in motherboard

Q2(iii)

4 marks

Role of a nucleus in a cell:

The nucleus is the control centre of a cell. It contains DNA and controls all cell activities like growth, metabolism and reproduction. It also directs protein synthesis.

Q2(iv)

4 marks

Series Circuit: In a series circuit, components are connected end to end so there is only one path for current.

Parallel Circuit: In a parallel circuit, components are connected across common points, there are multiple paths for current.

Diagram:

Series

parallel

Q2(v)

4 marks

• **Input Devices:**

Key Board: Used to enter text, numbers.

Mouse: Used to click or select items

Operation: Used to enter data and instructions into the computer.

• **Output Devices:**

Monitor: Displays text, images as output.

Printer: Produces a hard copy of doc.

Operation: Used to show the result of processing to the user.

Q2(vi)

4 marks

RubricEye Exam

Q2(vii)

4 marks

Intentionally Left Blank

Q3(A)

8 marks

[illegible]

7 marks

1. Introduction
 The purpose of this report is to provide a comprehensive overview of the current state of the market for [Product/Service]. This report will analyze the market's growth, challenges, and opportunities, and provide recommendations for [Company/Individual].

2. Market Overview
 The market for [Product/Service] is currently experiencing rapid growth, driven by increasing demand and technological advancements. The market is expected to continue to grow over the next five years, with a projected CAGR of [X]%.

3. Key Findings
 The following key findings were identified during the research process:

- The market is highly competitive, with [Number] major players.
- There is a significant gap in the market for [Product/Service], which presents a major opportunity for [Company/Individual].
- Key challenges facing the market include [Challenge 1] and [Challenge 2].

4. Recommendations
 Based on the findings, the following recommendations are provided:

- [Company/Individual] should focus on developing a strong competitive advantage in the [Product/Service] market.
- [Company/Individual] should consider partnering with [Company/Individual] to leverage their expertise in [Area].

5. Conclusion
 The market for [Product/Service] is a highly competitive and rapidly growing market. [Company/Individual] has the potential to succeed in this market by focusing on the key findings and recommendations outlined in this report.

Q4(A)

8 marks

Algorithm: An algorithm is a step-by-step instruction written in simple English to solve a specific problem. It is independent of any programming language and helps plan the logic before writing an actual code.

Characteristics:

Definiteness: Every step of the algorithm must be clear and unambiguous. There should be no confusion.

Finiteness: An algorithm must have a limited number of steps. It should start and end after a finite time.

Effectiveness: Every step must be basic and doable with the available resources. The operations should be simple.

Advantage:

Easier to debug and code: When we write an algorithm first, we can check the logic for error. This saves time because it is much easier to correct mistakes. It also makes actual coding more organized.

Q4(B)

7 marks

Flowchart:

ROUGH WORK

[Faint, illegible handwritten notes and diagrams are visible within the large rectangular area.]
